Subject: Application for Senior GIS / LiDAR Engineer Position

Dear Hiring Manager,

I am writing to apply for the Senior GIS / LiDAR Engineer position at your organization. With over five years of professional experience in GIS, airborne and UAV LiDAR processing, geospatial QA/QC, surface modelling, powerline corridor mapping, photogrammetry, and geospatial automation, I offer a strong combination of technical expertise and project delivery experience.

Throughout my career, I have worked extensively with LiDAR point-cloud processing, classification, flight-line matching, noise removal, DTM/DSM/TIN generation, breakline creation, feature extraction, and quality assurance. I have hands-on experience with TerraScan/TerraSolid, MicroStation, ArcGIS, QGIS, Global Mapper, AutoCAD, and Agisoft Metashape. I have also developed TerraScan and classification macros and used Python to automate repetitive geospatial workflows.

My experience includes supporting large-scale infrastructure and mapping projects in the UK and Qatar. During my international deployment in Qatar, I led airborne LiDAR processing for urban mapping projects and worked directly with public-sector stakeholders, including Qatar's Ministry of Municipality and Environment. I have also contributed to UK infrastructure projects involving LiDAR classification, powerline processing, photogrammetry, and QA/QC.

In my current role as a Geographic Information Systems Consultant, I coordinate project delivery, support international stakeholders, perform LiDAR and GIS workflows, and contribute to powerline corridor analysis, including centerline creation, catenary analysis, and automated danger-zone identification. This combination of hands-on technical capability and coordination experience allows me to contribute both as an individual technical specialist and as part of a larger project team.

I am particularly interested in opportunities where I can apply my LiDAR, GIS, automation, and geospatial analysis expertise to challenging mapping and infrastructure projects while continuing to develop technically and take on greater responsibility.

I would welcome the opportunity to discuss how my experience and technical skills can contribute to your team. Thank you for considering my application.

Sincerely,

Sangram Kumar Nahak
